FINANCE AND TRADE.

Money MATTERS were dull as ever yesterday-people without money growling because they could not borrow, and people with it because they could not loan. The Vicksburg Herald sums all up as follows, and its description applies fully to Memphis: "The money new, 11½c; elarified yellow, new, 9½@10½c; open kettle, new, 7@9c; choice white, new, 11½@11‡c. Molasses and syrups, nothing new to report in the monetary barrel, domestic, \$1 80. of currency at the banks, and scarcity of funds with the multitude; of thou- 5 25. ing because of the scarcity of money in circulation, and banks complaining pecause of the too limited demand upon them for loans. The whole situation seems to resolve itself into this, that those who want money can't get it, and those who can get it don't want it." The St. Louis Globe of Monday states: "There is at the preent time an improved feeling regarding Arkansas question has been settled by congress, in not disturbing the present accumulatration of that State. Southern securities are slow to negotiate, but time will probably bring them into favor." The financial bill has, up to this time, contracted the currency owing to some of the National banks having surrendered a portion of their circulation. The St. Louis Democrat observes: "As long as the note-issuing power of national banks was a monopoly it was valuable; but as soon as it was opened to any who chose to comply with certain conditions it became almost valueless, and banks began to surrender circulation rapidly." Gold in New York was again on the upward way. During the morning two telegrams reported it at 115 and the third at 115; the brokers here were paying 114. There was some discussion on the Torbett money decision. The gen-eral impression appears to be that its eff-ct, taken in connection with the previous decision of the United States bourt, will be to make the new issue receivable for taxes and worth 75 on the market. There are, of course, other views-some urge that the decision of the State courts will be appealed from, and that, in such a case the United ole issue invalid being issued for surpose of making war upon the Unity States. It is replied to this that -withever use might or might not be made othermoney after it was issued, the issue vas not made for the purpose of aiding be rebellion, that it is in the hands of hadreds of innocent holders wise took it good faith and often for consideration remote from any war purpose or conection. A decision in a South Carolina ase, made by the United States supreme court, has settled this point. Another objection was made, not sgainst the issue, but founded on the a leged possible that fraudulent notes may be abad. The plates belonging to the bab were carried off, it is not known in wase possession they are held; the questa therefore arises whether the holders of the plates may no, have used them or the purpose of issuing notes that can ave no possible value when presented the bank for jection Exchange was it inited offering but with ample supplie in immediate prospects, the stereotype rates were NEW YORK, Marc

RIVER CHRONICLE.

Meteorological and Aquatic.

The pleasant weather continues, and under the influence of the warm rays of the sun and the temperate atmosphere the tree tops and shrubbery are beginning to wear the brown appear-auce, indicating swelling buds, which, should no sudden change to colder weather intervene, will soon develope into the green foliage of spring. The weather-wise predict an unusually early spring, upon what principle or precedent we are not advised, and can only join with the whole of t e human family in these parts in hoping that such predictions may be realized. The benefits resulting from the early breaking up of the winter, which in some latitudes has been the coldest one experienced within the knowledge of oldest inhabitants, are manifold, and too well-known to require to be discussed here, but the would be as happy as larks if the business was only half as abundant as the water. The snag tore a hele in her hull, just aft of her larboard wheel, and she lies on the obstruction that she struck, but is perfectly straight, and will, no doubt, be easily raised. The steamer Colorado was alongside of her yesterday, and took off her stock and deck load. The injury to the freight on deck will be very light, as the water did not cover her main deck. The City of Vicksburg belongs to the

Memphis Packet company, and was one of their best and most popular steamers. She was built in 1873, at a cost of one hundred and thirty thousand dollars, and would carry one thousand five hundred tons of freight. There was no insurance on her.
